EXPERIENCE

Hitachi Insights Group | Bellevue, WA

UI Designer: 11/16 - Present

Hitachi has joined the race within the IoT marketplace, rapidly developing a software platform for visualization of data from industrial machines equipped with sensors.

Main Roles:

- Helped define MVP during planning phase, delivering site maps, user flows, and wireframes
- Conducted early-stage usability tests with simple, paper prototypes for rapid iteration of user flows
- Built prototypes using Bootstrap and AngularJS
- Designed and presented high-fidelity prototypes to stakeholders
- Developed UI in coordination with engineers using HTML, SCSS, and AngularJS

Mixpo, Inc. — Seattle, WA

Senior Web Designer: 2/11 - 4/13 / Front-End Developer: 4/13 - 11/16

Mixpo provides a web-based application that enables publishers to create and manage interactive advertising campaigns.

Main Roles:

- Build the UI and interactions for enterprise-level software
- Develop and maintain pattern library for other employees to reference
- Design and develop customizable widgets for added value of product
- Design and develop custom demos and prototypes for clients
- Development and maintenance of public and private CMS-driven web sites
- Work in close coordination with design and marketing to ensure feasibility and estimates for deliverables

Sesame Communications, Inc. — Seattle, WA

Senior Web Designer: 8/06 - 2/11

Sesame Communications provides practice management solutions and marketing websites to the dental & orthodontic industries.

Main Roles:

- Design and develop full websites for clients. Process involves creating design comps, revising based on client feedback, then building and delivering completed product
- Perform in close coordination with project managers while adhering to strict deadline metrics
- Support in-house marketing initiatives, maintenance of proprietary tools, and design/development of new material for proprietary content

EXPERIENCE

CONT.

Verizon Superpages | Everett, WA

Web Designer: 3/05 - 8/06

Verizon Superpages offers website design and development for small to medium businesses.

Main Roles:

- Designed and developed websites for small businesses advertising through Verizon Superpages
- Created Flash animations for website introductions and banners
- Consulted with clients to determine needs for design and functionality of websites
